Regional approaches to adaptation planning

technical guidance

for consideration of regional approaches to adaptation planning and implementation

Regional approaches to adaptation planning and implementation

- Rationale and entry points for regional collaboration and coherence in the formulation and implementation of NAPs;
- Challenges, lessons learned and good practices in regional approaches to adaptation planning and implementation;
- Practical ways to enhance the consideration of regional approaches to adaptation in the national development plans;
- Lessons on the design and implementation of regional adaptation programmes with countries, financial mechanism entities and other providers of support.
