

Supplements to the NAP Technical Guidelines

UNEP AND UNDP

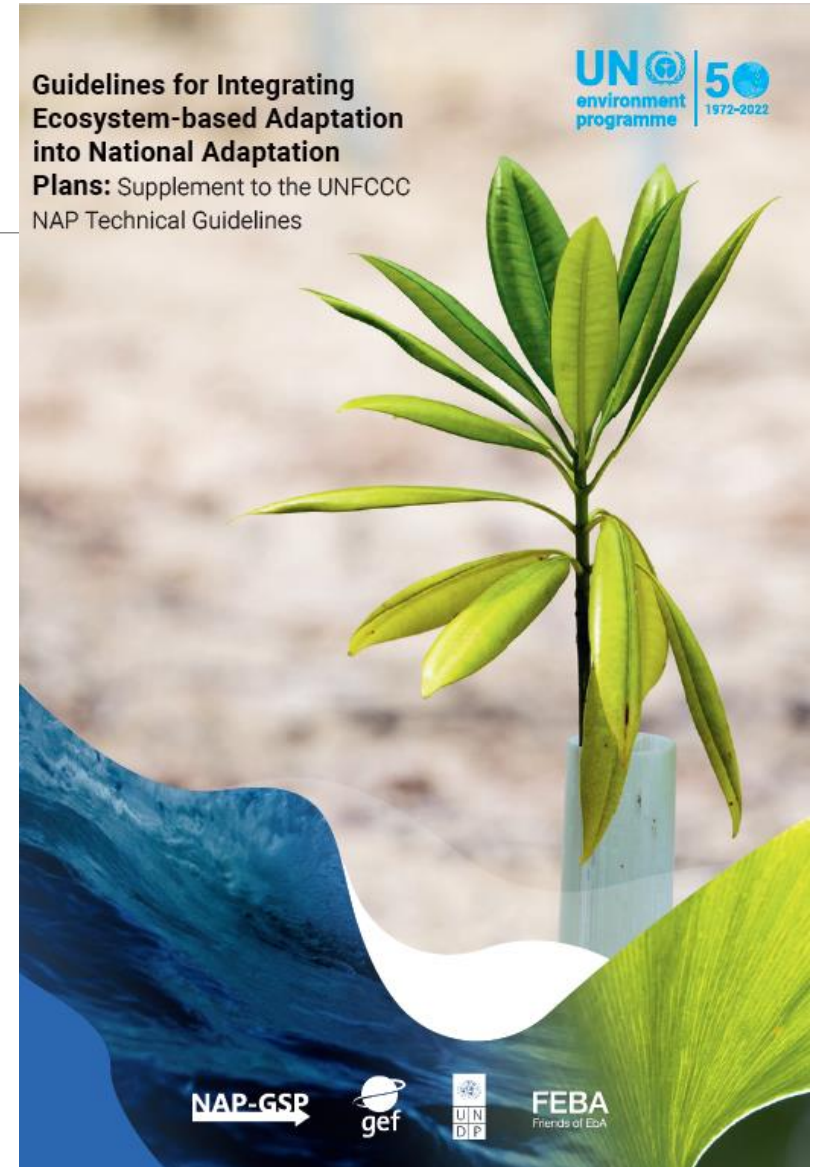

Guidelines for Integrating EbA into NAPs

Developed under the [NAP-Global Support Programme \(NAP-GSP\)](#), implemented jointly by UNDP and UNEP

Aim: Guiding adaptation practitioners at national and local level on how to take different steps when factoring ecosystems functions and services into countries' NAP processes and instruments.

The Guidelines provide details on:

- Multiple benefits as well as the challenges of adopting ecosystem-based approaches to climate change adaptation;
- Tools for advancing EbA and Case studies

Key messages for integrating EbA in each NAP stage

Formulation	<ul style="list-style-type: none">• Need for engaging stakeholders working on ecosystems services for climate risk management• Build countries' capacity on bringing EbA into play• Select EbA options through costs benefit, multi-Criteria analysis
Implementation	<ul style="list-style-type: none">• Need to empower stakeholders• Define base line to monitor adaptation success through practicing EbA• Demonstrate economic viability & sectoral investment
Review	<p>NAP as a living document:</p> <ul style="list-style-type: none">• Identify gaps & entry point for EbA• Consider how lessons learned would enable continuous update and revision of the NAP• Ministries of Finance & Planning, local government and other governmental entities take integrating EbA into account during the NAP review

E-learning online course with the support from [UNITAR](#) available here:

<https://unccelearn.org/course/view.php?id=145&page=overview>

Implemented by: UNEP and IUCN

Funded by: International Climate Initiative (IKI) under The Federal Ministry for Economic Affairs and Climate Action

Fund amount: 30 million Euros.

Purpose: To fast-track support to innovative and catalytic initiatives that help overcome barriers to upscaling EbA

Project amounts: USD 250,000 (max USD 500,000)

Project duration: 24 Months (max 36 months)
