Climate Change

# NAP CONTEXTUAL

MEL Institutional framework provided for under National Policy on Climate Change

# NAP ON GOING ACTIONS

# TECHNICAL SUPPORT/ COLLABORATION

- I. Finalizing of comprehensive Monitoring, Evaluation and Learning (MEL) framework for NAP
- II. Evidence based information to inform NAP process
  - a) Gender analysis
  - b) Climate change & Economic analysis
  - c) Hydrology analysis
- III. technical support reviewing of the actual NAP document itself

# AREAS OF OPPORTUNITIES TO SUPPORT NAP PROCESS

## 1. Climate risk analyses for identifying and weighing adaptation strategies in subSaharan Africa (AGRICA)-GIZ

- i. Inform the NAP process of priority identification and prioritization adaptation options therefore ensuring NAP process to be risk-informed and based on science
- ii. Synergy and compliment the ongoing work synthesizing of existing climate information on vulnerability, historical trends and future scenarios an economic and climate analysis of vulnerable sectors
- iii. The case study analysis using using climate change impact **on water availability in the Kafue catchment and catchment of Zambesi** for agriculture based on water balance model would relevant for the hydrology analysis synthesizing of existing climate information

2. Country Hub support under NAP GSP for Zambia NAP MEL system

3. EU Technical assistance Using Kobo account created a an excel based project tracking tool with diverse visualization outputs budgets, Indicators (Outcome, outputs & KPI), sources of fund
