Flexibility

Climate Change Instruments

Carbon Neutrality and Resilience to 2050

Sectorial mitigation and adaptation Plans

Regional and Local Climate Change Plans

Basin Management Strategic Plans

National MRV System
(GHG Inventory, GHG Projections, Climate Risk Atlas, National Climate Change Report, BTR, National Communications).

MEANS OF IMPLEMENTATION STRATEGIES
Development and Transfer of Technologies
Capacity development and climate empowerment
Financing

Experience in Engaging Youth in Public Policies

Long Term Strategy (territorially, intergenerational, cultural, gender balanced approach on participatory process)

Capacity Building and Action for Climate Empowerment Strategy (participatory process)

Young Negotiators

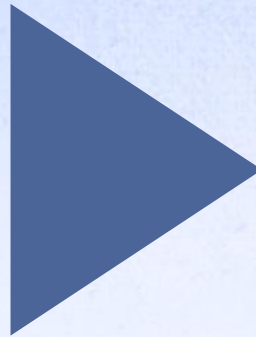

Partnerships with National Youth Conference on Climate Change Chile

National Council for Sustainability and Climate Change (by CC Law)

Good Practices and Recommendations Engaging Youth in Public Policies

Integrate youth in NAPs process could help:

- to have an innovative and transformative approach to solve complex problems.
- Integrate emergent topics at national and international levels
- translate climate information to a simple language and with new tools
- replicate climate information in social media

It is necessary that youth

- could connect international process (COY) with local needs
 - Support design and implementation of adaptation local projects
- Participate in science citizens projects
