

## JOINUS IN THE RACE TO A BETTER INIORID

**NAP EXPO 2023** 

Scaling up adaptation solutions, delivering system transformation and addressing barriers

Opportunities from:
Sharm El Sheikh Adaptation Agenda
(SAA) & Race to Resilience Campaign

Marcia Toledo, Resilience Lead Climate Champions Team

# Role and mandate of the High Level Champions (HLCs)...

To connect the work of governments with the actions taken by non-state actors, the parties decided to appoint two **High-Level Champions** 

#### The High Level Champions...

... mobilize action among non-state actors (NSAs) to spur even greater ambition and action

...connecting initiatives and coalitions from NSAs with national action plans such as nationally determined contributions (NDCs) to the Paris Agreement.

#### Marrakech Partnership

## ...jointly with the **Marrakech Partnership**

Under the leadership of the High-Level Champions, the **Marrakech Partnership...** 

## ...supports implementation of the Paris Agreement

**...enables collaboration** between governments and the cities, regions, businesses and investors that must act on climate change

... has 9 thematic areas which are coordinated by organizations designated as 'MP Focal Points' who in turn collaborate closely with the respective Climate Champions leads

## Mobilisation of Non-State/Non Party Actors to scale up adaptation action and enhance resilience is conducted through:

Scale adaptation solutions towards systems transformation: 30 outcome targets by 2030

Sharm el Sheikh Adaptation Agenda

Mobilise and align NSAs to increase resilience of 4bn people by 2030

Race to Resilience Campaign

Accountability & tracking progress

Progress Implementation Reports

**Key Stakeholders across all geographies:** 

Businesses, Investors Sub-nationals: Cities, States, Regions

Civil Society Organizations Youth

### Sharm El Sheikh Adaptation Agenda (SAA)

**Vision:** agenda of adaptation solutions that can

be scaled for a resilient world

Convergence: 30 adaptation solution targets by 2030

**Impact:** shape the narrative for adaptation

system transformation

Rally: NSAs and governments to deliver on

targets across 5 impact systems: food, water, oceans, human settlements and infrastructure and 2 enablers: planning

and finance

**Progress:** first ever tracking of progress on

adaptation solution implementation

**Report:** annual Implementation Report

Access the Report here

## **SAA:** Building from the Marrakech Partnership Resilience Pathway to one consolidated Sharm El Sheikh Adaptation Agenda

A 1.5° C resilient world in 2050 where all thrive in the face of multiple climate risks, uncertainty & Vision: change Marakech Partnershp Resilience Pathway infrastructure Focus on five food & coastal **Human settlements** water & services (Transport, Impact areas: agriculture zones & oceans energy & industry) 1 Resment Resilient human Resilient Resilient coastal Resilient water & natural settlements food & agri systems & oceans systems infrastructure systems systems House design, construction Restore and protect Land protection and Sustainable agriculture Diverse energy sources and access mangroves restoration Restore and protect Early warning systems Food loss & waste Avoided deforestation Clean cooking coral reefs Sharm El Sheikh Restore and protect Urban NbS Alternative proteins Battery storage Water systems seagrass, marshes & kelp Adaptation forests Agenda (SAA) Shifting food Social infrastructure Mobility Wastewater systems consumption Urban coastline Sustainable irrigation Transport infrastructure Waste management infrastructure system **Cross-Cutting Enablers** Universal access of climate Adaptation plans for **National Adaptation Plans** Adaptation plans for **Planning** cities & regions and Locally-led Principles risk information companies **Finance** Private finance Public finance Insurance

### Race to Resilience (RtR) Campaign

559

#### **SOLUTIONS**

Athens leads fight to counteract extreme heat

Race to Resilience partner, Extreme Heat

Tanzania: Establishing a voluntary carbon market to restore mangroves and support local communities

Lusaka, Zambia: The African city championing climate resilience through solid waste management (SWM)

Early warning system helps locals respond to extreme weather events in Sudan

Join us: https://racetozero.unfccc.int/system/racetoresilience/

#### RtR Framework

#### Campaign goal

#### 4 billion vulnerable people made more resilient by 2030

**Aggregate Pledges** (up to 2030)

**Aggregate Outcomes** (annual)

**Expected direct impacts** on beneficiaries, collected through global metrics and annual survey at different engagement levels

Achieved and validated direct impacts, at different engagement levels, updated every year since 2022 to 2030

#### **Cross-cutting outcomes on Resilience Attributes:**

changes fostered on key conditions (capacities, resources, knowledge, coordination..) which indirectly foster resilience and empower transformations, collected through periodical metric surveys and narratives.

Qualitative Impact Metrics

Inputs

(1) Partner initiatives; (2) initiative members (companies, investors, NGOs, cities, community groups, knowledge organizations); (3) member projects; (4) funding; and (5) resilience-building actions

### Summary

#### Scaling adaptation action is advanced when:

- Exchange of solutions local to local; global impact
- Clarity on a shared adaptation agenda; practical, tangible actionable solutions
- Understanding the different but complementary roles of multiple actors; businesses, financiers, cities, regions, CSOs. Synchronicity
- Equity, diversity and inclusion are at the core
- Common metrics frameworks help track progress
- Capacity and strong MEL implemented by actors
- Radical collaboration and recognition of the ambition loop to support national agendas

### Key opportunities to continue addressing barriers:

- Accelerating business transformation for adaptation, mobilising private finance for adaptation
- Universal access to climate risk information
- Amplifying the opportunities to invest in solutions that scale adaptation, mobilising finance sector for adaptation
- Capacity strengthening in MEL across all types of actors
- Governance settings and policy shifts needed to accelerate adaptation solutions

**Thank You!**
