Brief introduction to UN4NAPs

- UN-wide **rapid technical backstopping initiative** for **NAPs**,
- launched in **2021** by the secretariat, in response to mandates for engaging international organizations in support of climate change adaptation.
- Offers a **platform for countries**, initially for LDCs and SIDS,
- to **communicate** their **needs for technical assistance** on an **ongoing basis**,
- which the secretariat immediately channels to relevant partners from a **roster of more than 45 UN and intergovernmental organizations** for a prompt response.

Categories of technical assistance

- Simple **technical queries** which can be answered by relevant agencies via email;
- Delivery of **specific data/knowledge products** (such as datasets, analytical tools, guidance material);
- **Longer-term capacity development/engagement** with the requesting country;
- **Review of draft NAPs** upon request by a country, based on agencies' area of expertise, with a view to enhance the coverage of issues to facilitate subsequent implementation;
- Facilitation of **integration of adaptation priorities** into country support strategies of different agencies and organizations.

This session: objectives

- Countries to share and discuss challenges they face in the integration of questions related to migration and human mobility in the formulation and implementation of their NAPs;
 - For example, what capacities are needed by relevant institutions to include and address migration in the NAP process;
 - How to include migrants, internally displaced people and refugees in vulnerability assessments and what are relevant indicators for monitoring and evaluation;
 - How can NAPs help either prevent displacement or facilitate migration when needed;
 - How can planned relocation be included as an adaptation option/action in the NAP process and what technical assistance is available to countries;
 - What tools and sources exist for countries to access and include migration data into the process;
 - How can countries access best practices;
 - ...
- Learn about relevant guidance, tools and opportunities for technical assistance from within the UN4NAPs network and identify possible pathways of collaboration.
